

Naturally, this is one the first and most essential questions for anyone interested in engaging a professional immigration consultancy service.

Our aim is to provide our services for a reasonable fee and thus enabling anyone to immigrate, regardless of nationality and personal budget. Many of our clients have confirmed that, in the end, we saved them a substantial amount, by providing our professional and efficient service and contacts. In most cases it turned out that our clients even saved a higher amount than the fees paid to us; proving that our services basically have paid for themselves.

However, bearing in mind that we (like anybody else in this country) have to pay tax and other common expenses, obviously our consulting fees have to vary from almost nothing for an initial assessment (US\$ 42.00) to several thousands of NZ\$, depending on the services required and the time involved. Once an assessment of your personal chances and the evaluation of your details has been completed, you will receive a firm and reliable quotation for our services including a detailed breakdown of all expenses and fees payable to the authorities including the corresponding timeframe.

Please note that we offer a full money-back guarantee of all consulting fees paid to us even for the first instalment ! This is why we only accept cases, that are likely to succeed. Our company reputation is too precious and we will decline any cooperation if an application would not make any sense from our point of view. This is our guide and committment to help you become a happy New Zealander !

Fees are either to be paid by credit card, telegraphic transfer or international bank draft.
